Experience

Lead Programmer – Government Service Management System with Grave Locator Using AI

Capstone Project | School Project

- Led the development of a government service management system featuring an AI-powered grave locator and cemetery navigation system.
- Developed features that help citizens locate deceased family members within mapped cemetery locations.
- Implemented navigation functionality using OpenRouteService API.

- Designed administrative tools for cemetery mapping and record management.
- Integrated APIs from other systems as part of a cluster-based architecture.
- Selected as one of the participating projects during the Research Festival.

Lead Programmer – Coffee Win POS and Inventory Management System

Client-Based School Project

- Led the development of a Point-of-Sale (POS) system for a real coffee shop client.
- Developed inventory management functionality for product and stock monitoring.
- Created dashboard reports for sales analytics and cashier activity tracking.
- Integrated the POS system with a custom Loyalty Reward System to improve customer retention and engagement.
- Worked directly with client requirements and business processes.

Freelance Web Developer – BRO' Fruits & Vegetables Store

Freelance Project

- Developed a modern eCommerce website for a fruits and vegetables business.
- Created an admin panel that allows product and price management.
- Implemented responsive and user-friendly interfaces for customers and administrators.
- Designed the system to handle frequent product price adjustments.

Developer – TUKDIN Smart Task Management Platform

Personal Project

- Built a productivity and task management application with AI-powered insights.
- Developed Pomodoro Timer functionality for focused work sessions.
- Implemented Quick Capture features using voice and camera inputs.
- Added productivity tracking and task organization tools.
- Designed the platform to help users improve personal productivity and task management.

Technical Skills

- HTML5, CSS3, JavaScript
- React.js, Next.js
- Bootstrap, Tailwind CSS
- Database Management, MySQL
- API Integration, REST APIs
- Git, GitHub, Vercel, VS Code, Postman
- Responsive Web Design
- UI/UX Implementation
- Software Testing

- System Analysis
- Problem Solving
- Team Collaboration

Education

Bachelor of Science in Information Technology
Bestlink College of the Philippines
Graduated: 2026
